How do I get my money back from Onchain?

To transfer money to an onchain wallet, (+1-864-310-5443) you first need to obtain your wallet's receiving address. Open your non-custodial wallet—such as MetaMask, Trust Wallet, or Phantom—and select (+1-864-310-5443) the cryptocurrency you wish to receive, like Ethereum, Bitcoin, or USDC. Tap "Receive" or "Deposit," and copy the displayed wallet address or scan the QR code. (+1-864-310-5443)Be sure to note which network is being used, such as ERC20, BEP20, or Solana, as this is critical.

Next, log in to the centralized exchange or platform (+1-864-310-5443) where your funds currently reside, such as Coinbase, Binance, or Kraken. Navigate to the withdrawal or send section, paste your onchain wallet address, and select the exact same network that your wallet supports (+1-864-310-5443). Enter the amount you wish to transfer, review the network fee, and confirm the transaction. The funds will typically arrive within minutes to an hour, depending on network congestion. Always double-check (+1-864-310-5443) the address and network before confirming, as

transactions on the blockchain are irreversible.
